PREPARATION/PROCEDURE FOR FLOOR LEVELING AND FLATTENING

These instructions are for the installation of a floor leveling system in the specified area. It is important to follow these instructions carefully to ensure proper installation and performance of the system.

1. Prepare the floor surface by removing any debris or obstacles.
2. Mark the locations for the floor leveling system using the provided template.
3. Cut the subfloor to the marked locations using a jigsaw or utility knife.
4. Insert the leveling system into the cutouts and secure in place with the provided fasteners.
5. Ensure all leveling system components are properly aligned and secured.

Failure to follow these instructions may result in improper installation and potential damage to the system.

Attention:

This document is a reference guide and not for construction. Always consult with the manufacturer for proper installation instructions.
